# Mac Mail Email Setup

In this tutorial we will be guiding you through the process of configuring email on Mac Mail. We are using Mac Mail Version 10.2 on OS X . If you are using a different version or operating system, these instructions may differ.

Step 1: Add Account

Launch Mac Mail, click on **Mail** and then select **Add Account.**

Step 2: Select Account Type

Choose **Add Other Mail Account** and click **Continue.**

Step 3: Enter Account Information

Enter the following information:

Full Name:
This is the name that will appear on all outgoing mail from this account.

Email Address:
The full email address of your account.

Password:
The password of your email account.

Then click **Create.**

Step 4: Manually Configure Account

Add a Mail Account

To get started, provide the following information:

Full Name: Example User

Email Address: user@example.com

Password: ••••••••

Account must be manually configured

Cancel   Next

The system will prompt you that manual account configuration is required. Click **Next.**

Step 5: Enter Incoming Mail Server Information

Enter the following information:

Account Type:
We recommend IMAP.

Mail Server:
Enter **mail.iccable.com (@iccable.com addresses) or mail.mykrcc.com (@mykrcc.com addresses)**

User Name:
Your full email address.

Password:
Your email account password.

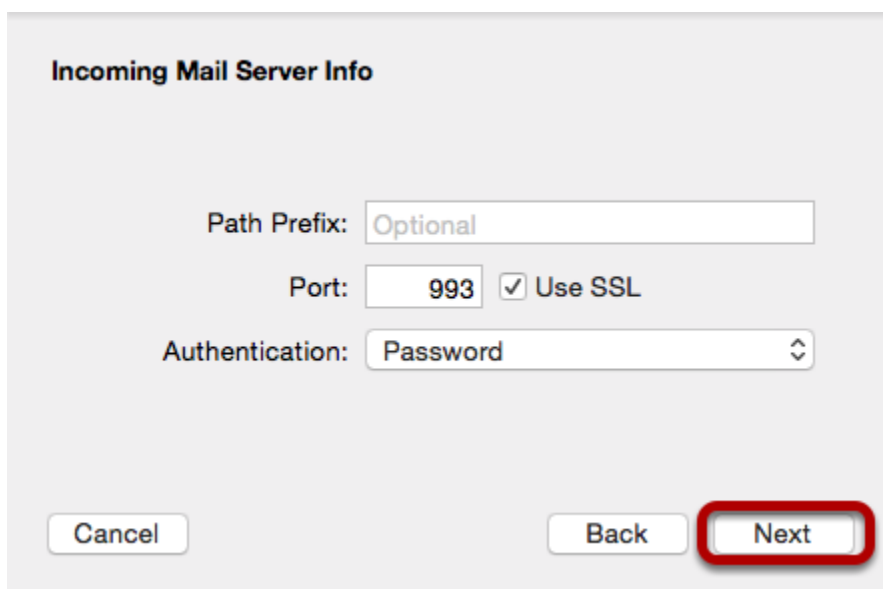

Click **Next.**

Step 6: Enter Incoming Server Port Information

Enter the following information
